Serial No. 09/694,241

## IN THE CLAIMS:

## 1. and 2. (Canceled)

3. (Currently Amended) A dextran-coated carrier having a surface with a connection between the dextran disposed as coating on the carrier formed by a photolinker, said dextran coating being formed on and covalently attached to said carrier by co-immobilization of resulting from a mixture of the dextran and a 3-trifluoromethyl-3-(m-isocyanophenyl)-diazirine (TRIMID)-modified amminodextran aminodextran, wherein the dextran is attached to the carrier through the 3-trifluoromethyl-3-(m-isocyanophenyl)-diazimine (TRIMID)-modified aminodextran.

## 4. and 5. (Canceled)

6. (Currently Amended) A dextran-coated surface according to claim 1 3, wherein said carrier surface is coated with a polymer film.

Serial No. 09/694,241

- 7. (Original) A dextran-coated surface according to claim 6, wherein said polymer film consists of one of polyimide and poly-(p-xylylene).
- 8. (Currently Amended) A dextran-coated surface according to claim 1\_3, wherein said carrier surface is a surface of a mass-sensitive sensor.
- 9. (Previously Presented) A dextran-coated surface according to claim 8, wherein said mass-sensitive sensor is surface acoustic waves conductive component.
- 10. (Currently Amended) A dextran-coated surface according to claim 1\_3, wherein said carrier surface is a surface of an optical or electro-mechanical sensor.
- 11. (Previously Presented) A dextran-coated surface according to claim 3, wherein said carrier surface is coated with a polymer film.

Serial No. 09/694,241

- 12. (Previously Presented) A dextran-coated surface according to claim 11, wherein said polymer film consists of one of polyimide and poly-(p-xylylene).
- 13. (Previously Presented) A dextran-coated surface according to claim 3, wherein said carrier surface is a surface of a mass-sensitive sensor.
- 14. (Previously Presented) A dextran-coated surface according to claim 13, wherein said mass-sensitive sensor is a surface acoustic waves conductive component.
- 15. (Currently Amended) A dextran-coated surface according to claim  $\frac{1}{3}$ , wherein said carrier surface is a surface of an optical or electro-mechanical sensor.
